

Datasheet for ABIN2321702

## **anti-NET1 antibody (Center, Internal Region)**

[Go to Product page](#)

### Overview

|                      |                                     |
|----------------------|-------------------------------------|
| Quantity:            | 200 µL                              |
| Target:              | NET1                                |
| Binding Specificity: | AA 231-261, Center, Internal Region |
| Reactivity:          | Human                               |
| Host:                | Rabbit                              |
| Clonality:           | Polyclonal                          |
| Conjugate:           | This NET1 antibody is un-conjugated |
| Application:         | ELISA, Western Blotting (WB)        |

### Product Details

|                             |                                                                                                                                                              |
|-----------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Immunogen:                  | NET1 antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 231-261 amino acids from the Central region of human NET1. |
| Isotype:                    | IgG                                                                                                                                                          |
| Cross-Reactivity:           | Human, Mouse (Murine)                                                                                                                                        |
| Cross-Reactivity (Details): | Calculated cross reactivity: Hu Mo                                                                                                                           |
| Characteristics:            | NET1, ID (NET1, ARHGEF8, Neuroepithelial cell-transforming gene 1 protein, Proto-oncogene p65 Net1, Rho guanine nucleotide exchange factor 8)                |
| Purification:               | Purified by Protein A affinity chromatography.                                                                                                               |

### Target Details

|                   |                                                          |
|-------------------|----------------------------------------------------------|
| Target:           | NET1                                                     |
| Alternative Name: | NET1 ( <a href="#">NET1 Products</a> )                   |
| NCBI Accession:   | <a href="#">NP_001040625</a> , <a href="#">NP_005854</a> |
| UniProt:          | <a href="#">Q7Z628</a>                                   |
| Pathways:         | <a href="#">Neurotrophin Signaling Pathway</a>           |

### Application Details

|                    |                                                                      |
|--------------------|----------------------------------------------------------------------|
| Application Notes: | Optimal working conditions should be determined by the investigator. |
| Restrictions:      | For Research Use only                                                |

### Handling

|                    |                                                                                                                        |
|--------------------|------------------------------------------------------------------------------------------------------------------------|
| Format:            | Liquid                                                                                                                 |
| Buffer:            | Supplied as a liquid in PBS, pH 7.2, 0.09 % sodium azide.                                                              |
| Preservative:      | Sodium azide                                                                                                           |
| Precaution of Use: | This product contains Sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only. |
| Storage:           | -20 °C                                                                                                                 |
| Storage Comment:   | -20°C                                                                                                                  |
