

Datasheet for ABIN2337367

**anti-PLEKHA1 antibody (PH domain)**[Go to Product page](#)

## Overview

|                      |                                        |
|----------------------|----------------------------------------|
| Quantity:            | 100 µg                                 |
| Target:              | PLEKHA1                                |
| Binding Specificity: | AA 1-404, PH domain                    |
| Reactivity:          | Human                                  |
| Host:                | Rabbit                                 |
| Clonality:           | Polyclonal                             |
| Conjugate:           | This PLEKHA1 antibody is un-conjugated |
| Application:         | Western Blotting (WB)                  |

## Product Details

|                             |                                                                                                                                                                 |
|-----------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Immunogen:                  | Full length human PLEKHA1, aa1-404 (NP_001001974.1).                                                                                                            |
| Isotype:                    | IgG                                                                                                                                                             |
| Cross-Reactivity:           | Human, Mouse (Murine)                                                                                                                                           |
| Cross-Reactivity (Details): | Calculated cross reactivity: Hu Mo                                                                                                                              |
| Characteristics:            | PLEKHA1 (Pleckstrin Homology Domain-containing Family A Member 1, PH Domain-containing Family A Member 1, TAPP1, Tandem PH Domain-containing Protein 1, TAPP-1) |
| Purification:               | Purified by Protein A affinity chromatography.                                                                                                                  |

## Target Details

|         |         |
|---------|---------|
| Target: | PLEKHA1 |
|---------|---------|

### Target Details

|                   |                                                                   |
|-------------------|-------------------------------------------------------------------|
| Alternative Name: | PLEKHA1 ( <a href="#">PLEKHA1 Products</a> )                      |
| NCBI Accession:   | <a href="#">NM_001001974</a> , <a href="#">NP_001001974</a>       |
| Pathways:         | <a href="#">Platelet-derived growth Factor Receptor Signaling</a> |

### Application Details

|                    |                                                                      |
|--------------------|----------------------------------------------------------------------|
| Application Notes: | Optimal working conditions should be determined by the investigator. |
| Restrictions:      | For Research Use only                                                |

### Handling

|                  |                                      |
|------------------|--------------------------------------|
| Format:          | Liquid                               |
| Buffer:          | Supplied as a liquid in PBS, pH 7.2. |
| Storage:         | -20 °C                               |
| Storage Comment: | -20°C                                |
