## Overview

|                      |                                                |
|----------------------|------------------------------------------------|
| Quantity:            | 200 µL                                         |
| Target:              | Proline Rich 15 (PRR15)                        |
| Binding Specificity: | AA 70-100, C-Term                              |
| Reactivity:          | Human                                          |
| Host:                | Rabbit                                         |
| Clonality:           | Polyclonal                                     |
| Conjugate:           | This Proline Rich 15 antibody is un-conjugated |
| Application:         | Western Blotting (WB), ELISA                   |

## Product Details

|                             |                                                                                                                                                                  |
|-----------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Immunogen:                  | PRR15 antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 70-100 amino acids from the C-terminal region of human PRR15. |
| Isotype:                    | IgG                                                                                                                                                              |
| Cross-Reactivity:           | Human                                                                                                                                                            |
| Cross-Reactivity (Details): | Calculated cross reactivity: Hu                                                                                                                                  |
| Characteristics:            | PRR15, CT (PRR15, Proline-rich protein 15)                                                                                                                       |
| Purification:               | Purified by Protein A affinity chromatography.                                                                                                                   |

## Target Details

|         |                         |
|---------|-------------------------|
| Target: | Proline Rich 15 (PRR15) |
|---------|-------------------------|

### Target Details

|                   |                                          |
|-------------------|------------------------------------------|
| Alternative Name: | PRR15 ( <a href="#">PRR15 Products</a> ) |
| NCBI Accession:   | <a href="#">NP_787083</a>                |
| UniProt:          | <a href="#">Q8IV56</a>                   |

### Application Details

|                    |                                                                      |
|--------------------|----------------------------------------------------------------------|
| Application Notes: | Optimal working conditions should be determined by the investigator. |
| Restrictions:      | For Research Use only                                                |

### Handling

|                    |                                                                                                                        |
|--------------------|------------------------------------------------------------------------------------------------------------------------|
| Format:            | Liquid                                                                                                                 |
| Buffer:            | Supplied as a liquid in PBS, pH 7.2, 0.09 % sodium azide.                                                              |
| Preservative:      | Sodium azide                                                                                                           |
| Precaution of Use: | This product contains Sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only. |
| Storage:           | -20 °C                                                                                                                 |
| Storage Comment:   | -20°C                                                                                                                  |
