Datasheet for ABIN235427
anti-HSV2 Glycoprotein G2 antibody

Overview

Quantity:	1 mL
Target:	HSV2 Glycoprotein G2 (HSV2 gG2)
Reactivity:	Herpes Simplex Virus (HSV)
Host:	Mouse
Clonality:	Monoclonal
Conjugate:	This HSV2 Glycoprotein G2 antibody is un-conjugated
Application:	Please inquire

Product Details

Clone:	H1206
Isotype:	IgG1
Specificity:	HSV Type 2 by Western blot. Produces a positive reaction with HSV-2 strain G infected Vero cells but not HSV-1 infected cells. Western blot assays revealed that this glycoprotein is highly processed and several antigenically related protein bands of gG-2 were detected.
Characteristics:	Monoclonal anti-HSV-2 gG-2
Purification:	Ascites, Non-delipidated
Sterility:	Non-sterile

Target Details

Target:	HSV2 Glycoprotein G2 (HSV2 gG2)

Target Details

Abstract: [HSV2 gG2 Products](#)

Target Type: Viral Protein

Application Details

Restrictions: For Research Use only

Handling

Format: Liquid

Preservative: Without preservative

Storage: -80 °C
