## Overview

|                      |                                                |
|----------------------|------------------------------------------------|
| Quantity:            | 50 µg                                          |
| Target:              | TMOD3                                          |
| Binding Specificity: | AA 1-352                                       |
| Reactivity:          | Human                                          |
| Host:                | Mouse                                          |
| Clonality:           | Polyclonal                                     |
| Conjugate:           | This TMOD3 antibody is un-conjugated           |
| Application:         | Western Blotting (WB), Immunofluorescence (IF) |

## Product Details

|                             |                                                         |
|-----------------------------|---------------------------------------------------------|
| Immunogen:                  | Full length human TMOD3, aa1-352 (NP_055362.1).         |
| Isotype:                    | IgG                                                     |
| Cross-Reactivity:           | Human                                                   |
| Cross-Reactivity (Details): | Calculated cross reactivity: Hu                         |
| Characteristics:            | TMOD3 (Tropomodulin-3, Ubiquitous Tropomodulin, U-Tmod) |
| Purification:               | Purified by Protein A affinity chromatography.          |

## Target Details

|                   |                                          |
|-------------------|------------------------------------------|
| Target:           | TMOD3                                    |
| Alternative Name: | TMOD3 ( <a href="#">TMOD3 Products</a> ) |

### Target Details

|                 |                                             |
|-----------------|---------------------------------------------|
| NCBI Accession: | NM_014547                                   |
| Pathways:       | Regulation of Actin Filament Polymerization |

### Application Details

|                    |                                                                      |
|--------------------|----------------------------------------------------------------------|
| Application Notes: | Optimal working conditions should be determined by the investigator. |
| Restrictions:      | For Research Use only                                                |

### Handling

|                  |                                      |
|------------------|--------------------------------------|
| Format:          | Liquid                               |
| Buffer:          | Supplied as a liquid in PBS, pH 7.2. |
| Storage:         | -20 °C                               |
| Storage Comment: | -20°C                                |
