## Overview

|              |                                            |
|--------------|--------------------------------------------|
| Quantity:    | 100 µg                                     |
| Target:      | Vasopressin (AVP)                          |
| Reactivity:  | Human                                      |
| Host:        | Mouse                                      |
| Clonality:   | Monoclonal                                 |
| Conjugate:   | This Vasopressin antibody is un-conjugated |
| Application: | ELISA                                      |

## Product Details

|                             |                                                                 |
|-----------------------------|-----------------------------------------------------------------|
| Immunogen:                  | Synthetic human (Arg8)-Vasopressin, bTG conjugated (CYFQNCPRG). |
| Sequence:                   | CYFQNCPRG                                                       |
| Clone:                      | VAS10-2-2                                                       |
| Isotype:                    | IgG2b                                                           |
| Cross-Reactivity:           | Human                                                           |
| Cross-Reactivity (Details): | Calculated cross reactivity: Hu                                 |
| Characteristics:            | Vasopressin (Arg, AVP, Arginine-8-Vasopressin)                  |
| Purification:               | Purified by Protein A affinity chromatography.                  |

## Target Details

|         |                   |
|---------|-------------------|
| Target: | Vasopressin (AVP) |
|---------|-------------------|

## Target Details

Alternative Name: Vasopressin ([AVP Products](#))

Pathways: [cAMP Metabolic Process](#)

## Application Details

Application Notes: Optimal working conditions should be determined by the investigator.

Restrictions: For Research Use only

## Handling

Format: Lyophilized

Reconstitution: Reconstitute with 10 µL of sterile dH<sub>2</sub>O.

Buffer: Supplied as a lyophilized powder from 200 mM Na-Citrate/Tris, 500 mM sodium chloride, 0.02 % sodium azide, pH 7.5 .

Preservative: Sodium azide

Precaution of Use: This product contains Sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only.

Storage: -20 °C

Storage Comment: -20°C
