

Datasheet for ABIN2385777

**anti-VLDLR antibody (Center, Internal Region)**[Go to Product page](#)

## Overview

|                      |                                                                                 |
|----------------------|---------------------------------------------------------------------------------|
| Quantity:            | 200 µL                                                                          |
| Target:              | VLDLR                                                                           |
| Binding Specificity: | AA 491-518, Center, Internal Region                                             |
| Reactivity:          | Human                                                                           |
| Host:                | Rabbit                                                                          |
| Clonality:           | Polyclonal                                                                      |
| Conjugate:           | This VLDLR antibody is un-conjugated                                            |
| Application:         | Western Blotting (WB), ELISA, Immunohistochemistry (IHC), Flow Cytometry (FACS) |

## Product Details

|                             |                                                                                                                                                                |
|-----------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Immunogen:                  | VLDLR antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 491-518 amino acids from the Central region of human VLDLR. |
| Isotype:                    | IgG                                                                                                                                                            |
| Cross-Reactivity:           | Human                                                                                                                                                          |
| Cross-Reactivity (Details): | Calculated cross reactivity: Hu                                                                                                                                |
| Characteristics:            | VLDLR, ID (VLDLR, Very low-density lipoprotein receptor)                                                                                                       |
| Purification:               | Purified by Protein A affinity chromatography.                                                                                                                 |

## Target Details

|         |       |
|---------|-------|
| Target: | VLDLR |
|---------|-------|

## Target Details

|                   |                                                                   |
|-------------------|-------------------------------------------------------------------|
| Alternative Name: | VLDLR ( <a href="#">VLDLR Products</a> )                          |
| NCBI Accession:   | <a href="#">NP_003374</a>                                         |
| UniProt:          | <a href="#">P98155</a>                                            |
| Pathways:         | <a href="#">Cellular Response to Molecule of Bacterial Origin</a> |

## Application Details

|                    |                                                                      |
|--------------------|----------------------------------------------------------------------|
| Application Notes: | Optimal working conditions should be determined by the investigator. |
| Restrictions:      | For Research Use only                                                |

## Handling

|                    |                                                                                                                        |
|--------------------|------------------------------------------------------------------------------------------------------------------------|
| Format:            | Liquid                                                                                                                 |
| Buffer:            | Supplied as a liquid in PBS, pH 7.2, 0.09 % sodium azide.                                                              |
| Preservative:      | Sodium azide                                                                                                           |
| Precaution of Use: | This product contains Sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only. |
| Storage:           | -20 °C                                                                                                                 |
| Storage Comment:   | -20°C                                                                                                                  |
