

Datasheet for ABIN2389734

**anti-Translin antibody (Center, Internal Region)**[Go to Product page](#)

## Overview

|                      |                                                          |
|----------------------|----------------------------------------------------------|
| Quantity:            | 200 µL                                                   |
| Target:              | Translin (TSN)                                           |
| Binding Specificity: | AA 116-146, Center, Internal Region                      |
| Reactivity:          | Human                                                    |
| Host:                | Rabbit                                                   |
| Clonality:           | Polyclonal                                               |
| Conjugate:           | This Translin antibody is un-conjugated                  |
| Application:         | Western Blotting (WB), Immunohistochemistry (IHC), ELISA |

## Product Details

|                             |                                                                                                                                                            |
|-----------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Immunogen:                  | TSN antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 116-146 amino acids from the Central region of human TSN. |
| Isotype:                    | IgG                                                                                                                                                        |
| Cross-Reactivity:           | Human                                                                                                                                                      |
| Cross-Reactivity (Details): | Calculated cross reactivity: Hu                                                                                                                            |
| Characteristics:            | TSN, ID (TSN, Translin, Component 3 of promoter of RISC)                                                                                                   |
| Purification:               | Purified by Protein A affinity chromatography.                                                                                                             |

## Target Details

|         |                |
|---------|----------------|
| Target: | Translin (TSN) |
|---------|----------------|

### Target Details

|                   |                                      |
|-------------------|--------------------------------------|
| Alternative Name: | TSN ( <a href="#">TSN Products</a> ) |
| NCBI Accession:   | <a href="#">NP_004613</a>            |
| UniProt:          | <a href="#">Q15631</a>               |

### Application Details

|                    |                                                                      |
|--------------------|----------------------------------------------------------------------|
| Application Notes: | Optimal working conditions should be determined by the investigator. |
| Restrictions:      | For Research Use only                                                |

### Handling

|                    |                                                                                                                        |
|--------------------|------------------------------------------------------------------------------------------------------------------------|
| Format:            | Liquid                                                                                                                 |
| Buffer:            | Supplied as a liquid in PBS, pH 7.2, 0.09 % sodium azide.                                                              |
| Preservative:      | Sodium azide                                                                                                           |
| Precaution of Use: | This product contains Sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only. |
| Storage:           | -20 °C                                                                                                                 |
| Storage Comment:   | -20°C                                                                                                                  |
