## Target Details

Target:	IVNS1ABP
Alternative Name:	IVNS1ABP ( <a href="#">IVNS1ABP Products</a> )
Target Type:	Influenza Protein
Background:	This gene encodes a protein which interacts with the nonstructural NS1 protein of the influenza A virus. In noninfected cells, affinity-purified antibodies localized this protein in nuclear regions enriched with the spliceosome assembly factor SC35, suggesting an association with the cellular splicing apparatus. In influenza A virus-infected cells, the protein relocalized throughout

## Target Details

	the nucleoplasm and appeared distinct from the SC35 domains, which suggests that its function may be disturbed or altered.
Molecular Weight:	72 kDa
