## Overview

|              |                                                          |
|--------------|----------------------------------------------------------|
| Quantity:    | 100 µL                                                   |
| Target:      | ZNF336                                                   |
| Reactivity:  | Rat, Human, Mouse                                        |
| Host:        | Rabbit                                                   |
| Clonality:   | Polyclonal                                               |
| Conjugate:   | This ZNF336 antibody is un-conjugated                    |
| Application: | Western Blotting (WB), ELISA, Immunohistochemistry (IHC) |

## Product Details

|               |                                                                                                         |
|---------------|---------------------------------------------------------------------------------------------------------|
| Immunogen:    | Antibody produced in rabbits immunized with a synthetic peptide corresponding a region of human ZNF336. |
| Purification: | Antibody is purified by peptide affinity chromatography method.                                         |

## Target Details

|                   |                                                                                                                                                                                  |
|-------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Target:           | ZNF336                                                                                                                                                                           |
| Alternative Name: | ZNF336 ( <a href="#">ZNF336 Products</a> )                                                                                                                                       |
| Background:       | ZNF212 belongs to the C2H2-type zinc finger gene family. The zinc finger proteins are involved in gene regulation and development, and are quite conserved throughout evolution. |
| Molecular Weight: | 80 kDa                                                                                                                                                                           |
| Gene ID:          | 64412                                                                                                                                                                            |

Target Details

NCBI Accession: [NP\\_071927](#)

UniProt: [Q9H116](#)

Application Details

Application Notes: ZNF336 antibody can be used for detection of ZNF336 by ELISA at 1:12500. ZNF336 antibody can be used for detection of ZNF336 by western blot at 1.0 µg/mL, and HRP conjugated secondary antibody should be diluted 1:50,000 - 100,000.

Restrictions: For Research Use only

Handling

Format: Lyophilized

Reconstitution: Add 50 µL of distilled water. Final antibody concentration is 1 mg/mL.

Concentration: 1 mg/mL

Buffer: Antibody is lyophilized in PBS buffer with 2 % sucrose.

Handling Advice: As with any antibody avoid repeat freeze-thaw cycles.

Storage: 4 °C/-20 °C

Storage Comment: For short periods of storage (days) store at 4 °C. For longer periods of storage, store ZNF336 antibody at -20 °C.
