## Overview

|                      |                                                                           |
|----------------------|---------------------------------------------------------------------------|
| Quantity:            | 0.1 mg                                                                    |
| Target:              | IRAK4                                                                     |
| Binding Specificity: | C-Term                                                                    |
| Reactivity:          | Human                                                                     |
| Host:                | Rabbit                                                                    |
| Clonality:           | Polyclonal                                                                |
| Conjugate:           | This IRAK4 antibody is un-conjugated                                      |
| Application:         | Western Blotting (WB), Immunohistochemistry (Frozen Sections) (IHC (fro)) |

## Product Details

|                  |                                                                                |
|------------------|--------------------------------------------------------------------------------|
| Immunogen:       | A peptide corresponding to amino acids at the carboxy terminus of human IRAK4. |
| Isotype:         | IgG                                                                            |
| Characteristics: | Purified IgG                                                                   |
| Purification:    | Purified                                                                       |

## Target Details

|                   |                                          |
|-------------------|------------------------------------------|
| Target:           | IRAK4                                    |
| Alternative Name: | IRAK4 ( <a href="#">IRAK4 Products</a> ) |
| Gene ID:          | 51135                                    |
| UniProt:          | <a href="#">Q9NWZ3</a>                   |

## Target Details

Pathways: [NF-kappaB Signaling](#), [TLR Signaling](#), [Activation of Innate immune Response](#), [Toll-Like Receptors Cascades](#)

## Application Details

Application Notes: Optimal working dilution should be determined by the investigator.

Restrictions: For Research Use only

## Handling

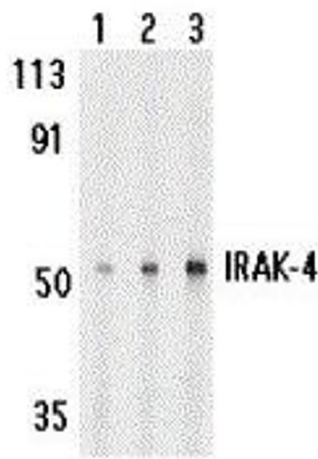

Format: Liquid

Concentration: 1.0 mg/mL

## Publications

Product cited in: Suzuki, Suzuki, Yeh: "IRAK-4 as the central TIR signaling mediator in innate immunity." in: **Trends in immunology**, Vol. 23, Issue 10, pp. 503-6, (2002) ([PubMed](#)).
