Target Details

Background:	Aha1 is a member of the HSP90 cochaperone family, and is thought to stimulate HSP90
	ATPase activity by competing with p23 and other co-chaperones for HSP90 binding (1, 2). It
	may affect a step in the endoplasmic reticulum to Golgi trafficking. Aha1 also interacts with
	HSPCA/HSP90 and with the cytoplasmic tail of the vesicular stomatistis virus glycoproteins
	(VSV G) (3). Aha1 is expressed in numerous tissues, including the brain, heart, skeletal muscle,
	and kidney, and at low levels, the liver and placenta. Aha1 might be a potential therapeutic
	strategy to increase sensitivity to HSP inhibitors (4).
Gene ID:	217737
NCBI Accession:	NP_666148
UniProt:	Q8BK64

Application Details

Application Notes:	 WB (1:1000) IHC (1:100) ICC/IF (1:1000) IP (1:1000) optimal dilutions for assays should be determined by the user.
Comment:	1 μg/ml of ABIN2481472 was sufficient for detection of Aha1 in 10 μg of rat tissue lysate by colorimetric immunoblot analysis using Goat anti-rat IgG:HRP as the secondary antibody.
