## Target Details

---

Alternative Name:	DUX4 ( <a href="#">DUX4 Products</a> )
Background:	DUX4, or double homeobox4, is a human protein that is a transcriptional activator of paired-like homeodomain transcription factor 1 (1). Clinically it is a facioscapulohumeral muscular dystrophy candidate gene that appears to have a toxic gain of function (2-4). In FSHD individuals, the expression of the full-length DUX4 transcript is not completely suppressed in skeletal muscle and possibly other differentiated tissues (5).
Gene ID:	22947
NCBI Accession:	<a href="#">NP_149418</a>
UniProt:	<a href="#">F5GZ66</a>

## Application Details

---

Application Notes:	<ul style="list-style-type: none"><li>• WB (1:1000)</li><li>• ICC/IF (1:1000)</li><li>• optimal dilutions for assays should be determined by the user.</li></ul>
Comment:	1 µg/ml of ABIN2482286 was sufficient for detection of DUX4 in 20 µg of HeLa cell lysate by ECL immunoblot analysis using goat anti-mouse IgG: HRP as the secondary.
Restrictions:	For Research Use only
