Target Details

Target: Nav1.8 (SCN10A)

Target Details

Alternative Name:	Nav1.8 (SCN10A Products)
Background:	Nav1.8 is a voltage-gated sodium channel and plays a critical role in the generation and
	conduction of action potentials and is thus important for electrical signaling by most excitable
	cells. Therapeutically, the association of pain insensitivity with the loss of function of a certain
	sodium channel may have implications. Since Nav1.8 is not present in cardiac muscle or
	neurons in the central nervous system, blockers of Nav1.8 will not have direct action on these
	cells and thus can have less side effects than current pain medications. By performing more
	studies, there is a possibility to develop a new generation of drugs that can reduce the pain
	intensity in animals.
Gene ID:	29571
