Target Details

Target:	SLC5A5
Alternative Name:	Sodium Iodide Symporter (SLC5A5 Products)
Background:	The sodium iodide symporter (NIS) is an ion pump that actively transports iodide across the basolateral membrane into thyroid epithelial cells (1, 2). This is important step in the process of iodide organificaton and the formation of triiodothyronine and thyroxine (3).
Gene ID:	6528
NCBI Accession:	NP_000444
UniProt:	Q92911

Application Details

Application Notes:	• WB (1:1000) • IHC (1:1000) • optimal dilutions for assays should be determined by the user.
Comment:	1 µg/ml of ABIN2484459 was sufficient for detection of hNIS in 20 µg of transfected COS-7 cell membrane lysate by ECL immunoblot analysis using Goat anti-mouse IgG:HRP as the secondary antibody.
Restrictions:	For Research Use only
