Product Details	
Immunogen:	Synthetic peptide amino acids 442- 462 (QDFRRSFKHILFRRRRRGFRQ, cytoplasmic C-
	terminus) of human Alpha-2C adrenergic receptor
Clone:	S330A-80
Isotype:	lgG1
Specificity:	Detects 50 kDa or larger (possibly due to dimerization). Does not cross-react with other
	adrenergic receptors.
Cross-Reactivity:	Human, Mouse
Purification:	Protein G Purified

Target Details

Target:	ADRA2C
Alternative Name:	Alpha2C Adrenergic (ADRA2C Products)
Background:	The alpha 2C Adrenergic Receptor controls the release of neurotransmitter from central adrenergic neurons and from sympathetic nerves in the heart. This receptor also plays a role in cognitive and behavioral function. Two variants are produced by alternative splicing. Alpha 2C Adrenergic Receptor has been reported extensively in the brain. Blood, corpus cavermosum, kidney, and heart tissues have also been reported to express the protein.
Gene ID:	152
NCBI Accession:	NP_000674
UniProt:	P18825
Pathways:	EGFR Signaling Pathway, cAMP Metabolic Process
Application Details	
Application Notes:	 WB (1:1000) optimal dilutions for assays should be determined by the user.
Comment:	1μ g/ml of ABIN2485199 was sufficient for detection of Alpha2C Adrenergic Receptor in 20 μg of COS cells transiently transfected with HA-tagged Alpha- lysate and assayed by colorimetric immunoblot analysis using goat anti-mouse IgG:HRP as the secondary antibody.
