Target Details

Target:	CLCN3

Target Details

Alternative Name:	ClCN3 (CLCN3 Products)
Background:	Clcn3 mediates the exchange of chloride ions against protons, and functions as an antiporter and contributes to the acidification of the endosome and synaptic vesicle lumen, and may thereby affect vesicle trafficking and exocytosis. It may play an important role in neuronal cell function through regulation of membrane excitability by protein kinase C. It could also help neuronal cells to establish short-term memory.
Gene ID:	84360
NCBI Accession:	NP_445815
UniProt:	P51792

Application Details

Application Notes:	• WB (1:1000) • IHC (1:1000) • ICC/IF (1:100) • optimal dilutions for assays should be determined by the user.
Comment:	1 µg/ml of ABIN2485481 was sufficient for detection of Clcn3 in 20 µg of rat brain membrane lysate and assayed by colorimetric immunoblot analysis using goat anti-mouse IgG:HRP as the secondary antibody.
Restrictions:	For Research Use only
