l arget Details	
Alternative Name:	GABA A Receptor (GABRA1 Products)
Background:	The GABA-A receptor is a member of the superfamily of fast acting ligand-gated ion channels. The individual subunits of these receptors have similar sequences and structural features (1). GABA-A receptors are the major fast inhibitory neurotransmitter gated ion channels in the brain (2).
Gene ID:	289606
NCBI Accession:	NP_001129251
UniProt:	P23576
Application Details	
Application Notes:	 WB (1:1000) ICC/IF (1:100) optimal dilutions for assays should be determined by the user.
Comment:	A 1:100 dilution of ABIN2485719 was sufficient for detection of GABA-A R, Alpha2 in 20 μ g of mouse brain lysate by ECL immunoblot analysis using Goat anti-mouse IgG:HRP as the secondary antibody.
