Target Details		
Alternative Name:	HSP101 (HSP101 Products)	
Background:	AGI Code: At1g74310 Hsp101/ClpB is a member of HSP100 protein family. These proteins help protein aggregates formed during heat stress to fall apart to allow them to be refolded by other chaperones. In spite of expression during heat stress members of HSP100 protein family are also expressed during seed development.	
Molecular Weight:	101 kDa	
UniProt:	P42730
