Datasheet for ABIN2533006 EV ELISA Kit

Overview

Quantity:	96 tests
Target:	EV
Reactivity:	Human
Application:	ELISA

Product Details

Purpose:	Human Enterovirus ELISA Kit is an ELISA kit against Human Enterovirus.
Sample Type:	Cell Culture Supernatant, Plasma, Serum
Analytical Method:	Qualitative
Detection Method:	Colorimetric
Characteristics:	Human Enterovirus ELISA Kit is an ELISA kit against Human Enterovirus.

Target Details

Target:	EV
Alternative Name:	Enterovirus (EV Products)
Target Type:	Virus

Application Details

Application Notes:	Stability: The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5 % within the expiration date under appropriate storage conditions. To minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled.
--------------------	--

Application Details

It is also strongly suggested that the whole assay is performed by the same user throughout.
Recommended dilutions: Optimal dilutions/concentrations should be determined by the end user.

Comment: The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5% within the expiration date under appropriate storage conditions. To minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout.

Plate: Pre-coated

Restrictions: For Research Use only

Handling

Storage: 4 °C/-20 °C

Storage Comment: Upon receipt, store the kit according to the storage instruction in the kit's manual.

Expiry Date: 6 months
