

Datasheet for ABIN2533039

Ephrin B2 ELISA Kit

Overview

Quantity:	96 tests
Target:	Ephrin B2 (EFNB2)
Reactivity:	Mouse
Method Type:	Sandwich ELISA
Detection Range:	0.156 ng/mL - 10 ng/mL
Minimum Detection Limit:	0.156 ng/mL
Application:	ELISA
Product Details	
Purpose:	Mouse Ephrin B2 ELISA Kit is a sandwich ELISA kit for use with Tissue homogenates and other
ruipose.	Mode Ephili be Ellow Nit is a sandwich Ellow Nit for use with Hissac homogenates and other
ruipose.	biological fluids. This assay has high sensitivity and excellent specificity for detection of Ephrin

ruipuse.	biological fluids. This assay has high sensitivity and excellent specificity for detection of Ephrin
r ui puse.	biological fluids. This assay has high sensitivity and excellent specificity for detection of Ephrin B2 (EFNB2)
Sample Type:	biological fluids. This assay has high sensitivity and excellent specificity for detection of Ephrin B2 (EFNB2) No significant cross-reactivity or interference between Ephrin B2 (EFNB2) and analogues was
·	biological fluids. This assay has high sensitivity and excellent specificity for detection of Ephrin B2 (EFNB2) No significant cross-reactivity or interference between Ephrin B2 (EFNB2) and analogues was observed.
Sample Type:	biological fluids. This assay has high sensitivity and excellent specificity for detection of Ephrin B2 (EFNB2) No significant cross-reactivity or interference between Ephrin B2 (EFNB2) and analogues was observed. Tissue Homogenate
Sample Type: Analytical Method:	biological fluids. This assay has high sensitivity and excellent specificity for detection of Ephrin B2 (EFNB2) No significant cross-reactivity or interference between Ephrin B2 (EFNB2) and analogues was observed. Tissue Homogenate Quantitative
Sample Type: Analytical Method: Detection Method:	biological fluids. This assay has high sensitivity and excellent specificity for detection of Ephrin B2 (EFNB2) No significant cross-reactivity or interference between Ephrin B2 (EFNB2) and analogues was observed. Tissue Homogenate Quantitative Colorimetric

Target Details

Target Details		
Target:	Ephrin B2 (EFNB2)	
Abstract:	EFNB2 Products	
Pathways:	RTK Signaling, Regulation of Muscle Cell Differentiation	
Application Details		
Application Notes:	Stability: The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5 % within the expiration date under appropriate storage conditions. To minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout. Recommended dilutions: Optimal dilutions/concentrations should be determined by the end user. Standard Form: Lyophilized	
Comment:	The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5% within the expiration date under appropriate storage conditions minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout.	
Plate:	Pre-coated Pre-coated	
Restrictions:	For Research Use only	
Handling		

Storage:	4 °C/-20 °C
Storage Comment:	Upon receipt, store the kit according to the storage instruction in the kit's manual.
Expiry Date:	6 months
