FGG ELISA Kit

Overview

Specificity:

Sensitivity:

(FGg)

< 1.44 ng/mL

0.0	
Quantity:	96 tests
Target:	FGG
Reactivity:	Rat
Method Type:	Sandwich ELISA
Detection Range:	3.12 ng/mL - 200 ng/mL
Minimum Detection Limit:	3.12 ng/mL
Application:	ELISA
Product Details	
Purpose:	Rat Fibrinogen Gamma ELISA Kit is a sandwich ELISA kit for use with Plasma and cell culture supernates. This assay has high sensitivity and excellent specificity for detection of Fibrinogen Gamma (FGg) No significant cross-reactivity or interference between Fibrinogen Gamma (FGg) and analogues was observed.
Sample Type:	Plasma, Cell Culture Supernatant
Analytical Method:	Quantitative
Detection Method:	Colorimetric

This assay has high sensitivity and excellent specificity for detection of Fibrinogen Gamma

Target Details

Target:	FGG
Alternative Name:	Fibrinogen gamma (FGg) (FGG Products)
Application Details	
Application Notes:	Stability: The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5 % within the expiration date under appropriate storage conditions. To minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout. Recommended dilutions: Optimal dilutions/concentrations should be determined by the end user. Standard Form: Lyophilized
Comment:	The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5% within the expiration date under appropriate storage conditions minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout.
Plate:	Pre-coated
Restrictions:	For Research Use only
Handling	
Storage:	4 °C/-20 °C
Storage Comment:	Upon receipt, store the kit according to the storage instruction in the kit's manual.
Expiry Date:	6 months
