

## Datasheet for ABIN2533467 FBLN2 ELISA Kit

Overview

Quantity:	96 tests
Target:	FBLN2
Reactivity:	Human
Method Type:	Sandwich ELISA
Detection Range:	0.625 ng/mL - 40 ng/mL
Minimum Detection Limit:	0.625 ng/mL
Application:	ELISA
Product Details	
Purpose:	Human Fibulin 2 ELISA Kit is a sandwich ELISA kit for use with Serum, plasma and other biological fluids. This assay has high sensitivity and excellent specificity for detection of Fibulin 2 (FBLN2) No significant cross-reactivity or interference between Fibulin 2 (FBLN2) and analogues was observed.
Purpose: Sample Type:	biological fluids. This assay has high sensitivity and excellent specificity for detection of Fibulin 2 (FBLN2) No significant cross-reactivity or interference between Fibulin 2 (FBLN2) and analogues was

Target Details	
Target:	FBLN2
Abstract:	FBLN2 Products
Application Details	
Application Notes:	Stability: The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5 % within the expiration date under appropriate storage conditions. To minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout. Recommended dilutions: Optimal dilutions/concentrations should be determined by the end user. Standard Form: Lyophilized
Comment:	The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5% within the expiration date under appropriate storage conditions minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout.
Plate:	Pre-coated
Restrictions:	For Research Use only
Handling	
Storage:	4 °C/-20 °C
Storage Comment:	Upon receipt, store the kit according to the storage instruction in the kit's manual.
Expiry Date:	6 months
