Quantity: 96 tests Target: UCMA Reactivity: Human Method Type: Sandwich ELISA Detection Range: 3.12 ng/mL - 200 ng/mL Minimum Detection Limit: 3.12 ng/mL Application: ELISA Product Details Purpose: Human Gla Rich Protein ELISA Kit is a sandwich ELISA kit for use with Serum, plasma, tissue homogenates and other biological fluids. This assay has high sensitivity and excellent specificity for detection of Gla Rich Protein (GRP) No significant cross-reactivity or interference between Gla Rich Protein (GRP) and analogues was observed. Sample Type: Plasma, Serum, Tissue Homogenate Analytical Method: Quantitative Detection Method: Colorimetric Specificity: This assay has high sensitivity and excellent specificity for detection of Gla Rich Protein (GRP) Sensitivity: < 1.17 ng/mL		
Reactivity: Human Method Type: Sandwich ELISA Detection Range: 3.12 ng/mL - 200 ng/mL Minimum Detection Limit: 3.12 ng/mL Application: ELISA Product Details Purpose: Human Gla Rich Protein ELISA Kit is a sandwich ELISA kit for use with Serum, plasma, tissue homogenates and other biological fluids. This assay has high sensitivity and excellent specificity for detection of Gla Rich Protein (GRP) No significant cross-reactivity or interference between Gla Rich Protein (GRP) and analogues was observed. Sample Type: Plasma, Serum, Tissue Homogenate Analytical Method: Quantitative Detection Method: Colorimetric Specificity: This assay has high sensitivity and excellent specificity for detection of Gla Rich Protein (GRP)	Quantity:	96 tests
Method Type: Sandwich ELISA Detection Range: 3.12 ng/mL - 200 ng/mL Minimum Detection Limit: 3.12 ng/mL Application: ELISA Product Details Purpose: Human Gla Rich Protein ELISA Kit is a sandwich ELISA kit for use with Serum, plasma, tissue homogenates and other biological fluids. This assay has high sensitivity and excellent specificity for detection of Gla Rich Protein (GRP) No significant cross-reactivity or interference between Gla Rich Protein (GRP) and analogues was observed. Sample Type: Plasma, Serum, Tissue Homogenate Analytical Method: Quantitative Detection Method: Colorimetric Specificity: This assay has high sensitivity and excellent specificity for detection of Gla Rich Protein (GRP)	Target:	UCMA
Detection Range: 3.12 ng/mL - 200 ng/mL Minimum Detection Limit: 3.12 ng/mL Application: ELISA Product Details Purpose: Human Gla Rich Protein ELISA Kit is a sandwich ELISA kit for use with Serum, plasma, tissue homogenates and other biological fluids. This assay has high sensitivity and excellent specificity for detection of Gla Rich Protein (GRP) No significant cross-reactivity or interference between Gla Rich Protein (GRP) and analogues was observed. Sample Type: Plasma, Serum, Tissue Homogenate Analytical Method: Quantitative Detection Method: Colorimetric Specificity: This assay has high sensitivity and excellent specificity for detection of Gla Rich Protein (GRP)	Reactivity:	Human
Minimum Detection Limit: 3.12 ng/mL Application: ELISA Product Details Purpose: Human Gla Rich Protein ELISA Kit is a sandwich ELISA kit for use with Serum, plasma, tissue homogenates and other biological fluids. This assay has high sensitivity and excellent specificity for detection of Gla Rich Protein (GRP) No significant cross-reactivity or interference between Gla Rich Protein (GRP) and analogues was observed. Sample Type: Plasma, Serum, Tissue Homogenate Analytical Method: Quantitative Detection Method: Colorimetric This assay has high sensitivity and excellent specificity for detection of Gla Rich Protein (GRP)	Method Type:	Sandwich ELISA
Application: ELISA Product Details Purpose: Human Gla Rich Protein ELISA Kit is a sandwich ELISA kit for use with Serum, plasma, tissue homogenates and other biological fluids. This assay has high sensitivity and excellent specificity for detection of Gla Rich Protein (GRP) No significant cross-reactivity or interference between Gla Rich Protein (GRP) and analogues was observed. Sample Type: Plasma, Serum, Tissue Homogenate Analytical Method: Quantitative Detection Method: Colorimetric Specificity: This assay has high sensitivity and excellent specificity for detection of Gla Rich Protein (GRP)	Detection Range:	3.12 ng/mL - 200 ng/mL
Purpose: Human Gla Rich Protein ELISA Kit is a sandwich ELISA kit for use with Serum, plasma, tissue homogenates and other biological fluids. This assay has high sensitivity and excellent specificity for detection of Gla Rich Protein (GRP) No significant cross-reactivity or interference between Gla Rich Protein (GRP) and analogues was observed. Sample Type: Plasma, Serum, Tissue Homogenate Analytical Method: Quantitative Detection Method: Colorimetric Specificity: This assay has high sensitivity and excellent specificity for detection of Gla Rich Protein (GRP)	Minimum Detection Limit:	3.12 ng/mL
Purpose: Human Gla Rich Protein ELISA Kit is a sandwich ELISA kit for use with Serum, plasma, tissue homogenates and other biological fluids. This assay has high sensitivity and excellent specificity for detection of Gla Rich Protein (GRP) No significant cross-reactivity or interference between Gla Rich Protein (GRP) and analogues was observed. Sample Type: Plasma, Serum, Tissue Homogenate Analytical Method: Quantitative Detection Method: Colorimetric Specificity: This assay has high sensitivity and excellent specificity for detection of Gla Rich Protein (GRP)	Application:	ELISA
homogenates and other biological fluids. This assay has high sensitivity and excellent specificity for detection of Gla Rich Protein (GRP) No significant cross-reactivity or interference between Gla Rich Protein (GRP) and analogues was observed. Sample Type: Plasma, Serum, Tissue Homogenate Analytical Method: Quantitative Detection Method: Colorimetric Specificity: This assay has high sensitivity and excellent specificity for detection of Gla Rich Protein (GRP)	Product Details	
Analytical Method: Detection Method: Colorimetric Specificity: This assay has high sensitivity and excellent specificity for detection of Gla Rich Protein (GRP)	Purpose:	homogenates and other biological fluids. This assay has high sensitivity and excellent specificity for detection of Gla Rich Protein (GRP) No significant cross-reactivity or interference between Gla Rich Protein (GRP) and analogues
Detection Method: Colorimetric Specificity: This assay has high sensitivity and excellent specificity for detection of Gla Rich Protein (GRP)	Sample Type:	Plasma, Serum, Tissue Homogenate
Specificity: This assay has high sensitivity and excellent specificity for detection of Gla Rich Protein (GRP)	Analytical Method:	Quantitative
	Detection Method:	Colorimetric
Sensitivity: < 1.17 ng/mL	Specificity:	This assay has high sensitivity and excellent specificity for detection of Gla Rich Protein (GRP)
	Sensitivity:	< 1.17 ng/mL

Target Details

Target:	UCMA
Alternative Name:	Gla Rich Protein (GRP) (UCMA Products)
Application Details	
Application Notes:	Stability: The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5 % within the expiration date under appropriate storage conditions. To minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout. Recommended dilutions: Optimal dilutions/concentrations should be determined by the end user. Standard Form: Lyophilized
Comment:	The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5% within the expiration date under appropriate storage conditions minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout.
Plate:	Pre-coated
Restrictions:	For Research Use only
Handling	
Storage:	4 °C/-20 °C
Storage Comment:	Upon receipt, store the kit according to the storage instruction in the kit's manual.
Expiry Date:	6 months
