| Application Notes:  | Stability: The stability of the kit is determined by the rate of activity loss. The loss rate is less<br>than 5 % within the expiration date under appropriate storage conditions. To minimize<br>performance fluctuations, operation procedures and lab conditions should be strictly controlled.<br>It is also strongly suggested that the whole assay is performed by the same user throughout.<br>Recommended dilutions: Optimal dilutions/concentrations should be determined by the end<br>user.<br>Standard Form: Lyophilized |
