antibodies

## Datasheet for ABIN2534216 Haptoglobin beta Chain (HP) ELISA Kit

Overview

Quantity:	96 tests
Target:	Haptoglobin beta Chain (HP)
Reactivity:	Human
Method Type:	Sandwich ELISA
Detection Range:	6.25 ng/mL - 400 ng/mL
Minimum Detection Limit:	6.25 ng/mL
Application:	ELISA
Product Details	
Purpose:	Human Haptoglobin ELISA Kit is a sandwich ELISA kit for use with Serum, plasma, tissue homogenates, cell lysates, cell culture supernates and other biological fluids. This assay has high sensitivity and excellent specificity for detection of Haptoglobin (Hpt) No significant cross-reactivity or interference between Haptoglobin (Hpt) and analogues was observed.
	homogenates, cell lysates, cell culture supernates and other biological fluids. This assay has high sensitivity and excellent specificity for detection of Haptoglobin (Hpt) No significant cross-reactivity or interference between Haptoglobin (Hpt) and analogues was
Purpose:	homogenates, cell lysates, cell culture supernates and other biological fluids. This assay has high sensitivity and excellent specificity for detection of Haptoglobin (Hpt) No significant cross-reactivity or interference between Haptoglobin (Hpt) and analogues was observed.
Purpose: Sample Type:	homogenates, cell lysates, cell culture supernates and other biological fluids. This assay has high sensitivity and excellent specificity for detection of Haptoglobin (Hpt) No significant cross-reactivity or interference between Haptoglobin (Hpt) and analogues was observed. Cell Culture Supernatant, Cell Lysate, Plasma, Serum, Tissue Homogenate

Target Details	
Target:	Haptoglobin beta Chain (HP)
Alternative Name:	Haptoglobin beta (HP Products)
Application Details	
Application Notes:	Stability: The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5 % within the expiration date under appropriate storage conditions. To minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout. Recommended dilutions: Optimal dilutions/concentrations should be determined by the end user. Standard Form: Lyophilized
Comment:	The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5% within the expiration date under appropriate storage conditions minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout.
Plate:	Pre-coated
Restrictions:	For Research Use only
Handling	
Storage:	4 °C/-20 °C
Storage Comment:	Upon receipt, store the kit according to the storage instruction in the kit's manual.
Expiry Date:	6 months
