

Datasheet for ABIN2534297 HSP90 ELISA Kit

[Go to Product page](#)

Overview

Quantity:	96 tests
Target:	HSP90
Reactivity:	Human
Detection Range:	0.63 ng/mL - 40 ng/mL
Minimum Detection Limit:	0.63 ng/mL
Application:	ELISA

Product Details

Purpose:	Human Heat Shock Protein 90 ELISA Kit is an ELISA kit against Human Heat Shock Protein 90.
Sample Type:	Plasma, Serum
Analytical Method:	Quantitative
Detection Method:	Colorimetric
Sensitivity:	0.38 ng/mL
Characteristics:	Human Heat Shock Protein 90 ELISA Kit is an ELISA kit against Human Heat Shock Protein 90.

Target Details

Target:	HSP90
Alternative Name:	Heat Shock Protein 90 (HSP90 Products)
Pathways:	M Phase , Regulation of Cell Size , Signaling Events mediated by VEGFR1 and VEGFR2 , VEGFR1 Specific Signals

Application Details

Application Notes: Stability: The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5 % within the expiration date under appropriate storage conditions. To minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout. Recommended dilutions: Optimal dilutions/concentrations should be determined by the end user.

Comment: The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5% within the expiration date under appropriate storage conditions. To minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout.

Plate: Pre-coated

Restrictions: For Research Use only

Handling

Storage: 4 °C/-20 °C

Storage Comment: Upon receipt, store the kit according to the storage instruction in the kit's manual.

Expiry Date: 6 months
