

Datasheet for ABIN2534597

HABP2 ELISA Kit

Overview

Sensitivity:

Quantity:	96 tests
Target:	HABP2
Reactivity:	Human
Method Type:	Sandwich ELISA
Detection Range:	6.25 ng/mL - 400 ng/mL
Minimum Detection Limit:	6.25 ng/mL
Application:	ELISA
Product Details	
Purpose:	Human HABP2 ELISA Kit is a sandwich ELISA kit for use with Serum, plasma and other
Purpose:	Human HABP2 ELISA Kit is a sandwich ELISA kit for use with Serum, plasma and other biological fluids. This assay has high sensitivity and excellent specificity for detection of

Purpose:	biological fluids. This assay has high sensitivity and excellent specificity for detection of
Purpose:	biological fluids. This assay has high sensitivity and excellent specificity for detection of Hyaluronan Binding Protein 2 (HABP2)
Purpose: Sample Type:	biological fluids. This assay has high sensitivity and excellent specificity for detection of Hyaluronan Binding Protein 2 (HABP2) No significant cross-reactivity or interference between Hyaluronan Binding Protein 2 (HABP2)
	biological fluids. This assay has high sensitivity and excellent specificity for detection of Hyaluronan Binding Protein 2 (HABP2) No significant cross-reactivity or interference between Hyaluronan Binding Protein 2 (HABP2) and analogues was observed.
Sample Type:	biological fluids. This assay has high sensitivity and excellent specificity for detection of Hyaluronan Binding Protein 2 (HABP2) No significant cross-reactivity or interference between Hyaluronan Binding Protein 2 (HABP2) and analogues was observed. Plasma, Serum

< 2.53 ng/mL

Target Details

Target:	HABP2
Abstract:	HABP2 Products
Application Details	
Application Notes:	Stability: The stability of the kit is determined by the rate of activity loss. The loss rate is less
	than 5 % within the expiration date under appropriate storage conditions. To minimize
	performance fluctuations, operation procedures and lab conditions should be strictly controlled.
	It is also strongly suggested that the whole assay is performed by the same user throughout.
	Recommended dilutions: Optimal dilutions/concentrations should be determined by the end
	user.
	Standard Form: Lyophilized
Comment:	The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5%
	within the expiration date under appropriate storage conditions minimize performance
	fluctuations, operation procedures and lab conditions should be strictly controlled. It is also
	strongly suggested that the whole assay is performed by the same user throughout.
Plate:	Pre-coated Pre-coated
Restrictions:	For Research Use only
Handling	
Storage:	4 °C/-20 °C
Storage.	4 6/-20 6
Storage Comment:	Upon receipt, store the kit according to the storage instruction in the kit's manual.
Expiry Date:	6 months
