### Overview

|                          |                          |
|--------------------------|--------------------------|
| Quantity:                | 96 tests                 |
| Target:                  | IL17B                    |
| Reactivity:              | Mouse                    |
| Method Type:             | Sandwich ELISA           |
| Detection Range:         | 15.62 pg/mL - 1000 pg/mL |
| Minimum Detection Limit: | 15.62 pg/mL              |
| Application:             | ELISA                    |

### Product Details

|                    |  |
|--------------------|--|
| Purpose:           | <p>Mouse Interleukin 17B ELISA Kit is a sandwich ELISA kit for use with Serum, plasma and other biological fluids. This assay has high sensitivity and excellent specificity for detection of Interleukin 17B (IL17B)</p> <p>No significant cross-reactivity or interference between Interleukin 17B (IL17B) and analogues was observed. Please note that this kit is also provided as a mini ELISA, where less reagents would be provided for a more affordable option. Please contact us at &lt; a href="mailto:info@abbexa.com "&gt;info@abbexa.com for more information.</p> |
| Sample Type:       | Plasma, Serum  |
| Analytical Method: | Quantitative   |
| Detection Method:  | Colorimetric   |
| Specificity:       | This assay has high sensitivity and excellent specificity for detection of Interleukin 17B (IL17B)   |
| Sensitivity:       | < 6.8 pg/mL  |

## Target Details

---

Target: IL17B

Abstract: [IL17B Products](#)

## Application Details

---

Application Notes: Stability: The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5 % within the expiration date under appropriate storage conditions. To minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout. Recommended dilutions: Optimal dilutions/concentrations should be determined by the end user.  
Standard Form: Lyophilized

Comment: The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5% within the expiration date under appropriate storage conditions. - minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout.

Plate: Pre-coated

Restrictions: For Research Use only

## Handling

---

Storage: 4 °C/-20 °C

Storage Comment: Upon receipt, store the kit according to the storage instruction in the kit's manual.

Expiry Date: 6 months
