

Datasheet for ABIN2535751

Kallikrein 13 ELISA Kit

Overview

observed. Sample Type: Cell Lysate, Plasma, Serum, Tissue Homogenate Analytical Method: Quantitative Detection Method: Colorimetric		
Reactivity: Mouse Method Type: Sandwich ELISA Detection Range: 15.62 pg/mL - 1000 pg/mL Minimum Detection Limit: 15.62 pg/mL Application: ELISA Product Details Purpose: Mouse Kallikrein 13 ELISA Kit is a sandwich ELISA kit for use with Serum, plasma, tissue homogenates, cell lysates and other biological fluids. This assay has high sensitivity and excellent specificity for detection of Kallikrein 13 (KLK13) No significant cross-reactivity or interference between Kallikrein 13 (KLK13) and analogues observed. Sample Type: Cell Lysate, Plasma, Serum, Tissue Homogenate Analytical Method: Quantitative Detection Method: Colorimetric Specificity: This assay has high sensitivity and excellent specificity for detection of Kallikrein 13 (KLK13)	Quantity:	96 tests
Method Type: Sandwich ELISA Detection Range: 15.62 pg/mL - 1000 pg/mL Minimum Detection Limit: 15.62 pg/mL Application: ELISA Product Details Purpose: Mouse Kallikrein 13 ELISA Kit is a sandwich ELISA kit for use with Serum, plasma, tissue homogenates, cell lysates and other biological fluids. This assay has high sensitivity and excellent specificity for detection of Kallikrein 13 (KLK13) No significant cross-reactivity or interference between Kallikrein 13 (KLK13) and analogues observed. Sample Type: Cell Lysate, Plasma, Serum, Tissue Homogenate Analytical Method: Quantitative Detection Method: Colorimetric Specificity: This assay has high sensitivity and excellent specificity for detection of Kallikrein 13 (KLK13)	Target:	Kallikrein 13 (KLK13)
Detection Range: 15.62 pg/mL - 1000 pg/mL Minimum Detection Limit: 15.62 pg/mL Application: ELISA Product Details Purpose: Mouse Kallikrein 13 ELISA Kit is a sandwich ELISA kit for use with Serum, plasma, tissue homogenates, cell lysates and other biological fluids. This assay has high sensitivity and excellent specificity for detection of Kallikrein 13 (KLK13) No significant cross-reactivity or interference between Kallikrein 13 (KLK13) and analogues observed. Sample Type: Cell Lysate, Plasma, Serum, Tissue Homogenate Analytical Method: Quantitative Detection Method: Colorimetric Specificity: This assay has high sensitivity and excellent specificity for detection of Kallikrein 13 (KLK13)	Reactivity:	Mouse
Minimum Detection Limit: 15.62 pg/mL Application: ELISA Product Details Purpose: Mouse Kallikrein 13 ELISA Kit is a sandwich ELISA kit for use with Serum, plasma, tissue homogenates, cell lysates and other biological fluids. This assay has high sensitivity and excellent specificity for detection of Kallikrein 13 (KLK13) No significant cross-reactivity or interference between Kallikrein 13 (KLK13) and analogues observed. Sample Type: Cell Lysate, Plasma, Serum, Tissue Homogenate Analytical Method: Quantitative Detection Method: Colorimetric Specificity: This assay has high sensitivity and excellent specificity for detection of Kallikrein 13 (KLK13)	Method Type:	Sandwich ELISA
Application: ELISA Product Details Purpose: Mouse Kallikrein 13 ELISA Kit is a sandwich ELISA kit for use with Serum, plasma, tissue homogenates, cell lysates and other biological fluids. This assay has high sensitivity and excellent specificity for detection of Kallikrein 13 (KLK13) No significant cross-reactivity or interference between Kallikrein 13 (KLK13) and analogues observed. Sample Type: Cell Lysate, Plasma, Serum, Tissue Homogenate Analytical Method: Quantitative Detection Method: Colorimetric Specificity: This assay has high sensitivity and excellent specificity for detection of Kallikrein 13 (KLK13)	Detection Range:	15.62 pg/mL - 1000 pg/mL
Purpose: Mouse Kallikrein 13 ELISA Kit is a sandwich ELISA kit for use with Serum, plasma, tissue homogenates, cell lysates and other biological fluids. This assay has high sensitivity and excellent specificity for detection of Kallikrein 13 (KLK13) No significant cross-reactivity or interference between Kallikrein 13 (KLK13) and analogues observed. Sample Type: Cell Lysate, Plasma, Serum, Tissue Homogenate Analytical Method: Quantitative Detection Method: Colorimetric Specificity: This assay has high sensitivity and excellent specificity for detection of Kallikrein 13 (KLK13)	Minimum Detection Limit:	15.62 pg/mL
Purpose: Mouse Kallikrein 13 ELISA Kit is a sandwich ELISA kit for use with Serum, plasma, tissue homogenates, cell lysates and other biological fluids. This assay has high sensitivity and excellent specificity for detection of Kallikrein 13 (KLK13) No significant cross-reactivity or interference between Kallikrein 13 (KLK13) and analogues observed. Sample Type: Cell Lysate, Plasma, Serum, Tissue Homogenate Analytical Method: Quantitative Detection Method: Colorimetric Specificity: This assay has high sensitivity and excellent specificity for detection of Kallikrein 13 (KLK13)	Application:	ELISA
homogenates, cell lysates and other biological fluids. This assay has high sensitivity and excellent specificity for detection of Kallikrein 13 (KLK13) No significant cross-reactivity or interference between Kallikrein 13 (KLK13) and analogues observed. Sample Type: Cell Lysate, Plasma, Serum, Tissue Homogenate Analytical Method: Quantitative Detection Method: Colorimetric Specificity: This assay has high sensitivity and excellent specificity for detection of Kallikrein 13 (KLK13)	Product Details	
Analytical Method: Detection Method: Colorimetric Specificity: This assay has high sensitivity and excellent specificity for detection of Kallikrein 13 (KLK13)		
Detection Method: Colorimetric Specificity: This assay has high sensitivity and excellent specificity for detection of Kallikrein 13 (KLK13)	Purpose:	homogenates, cell lysates and other biological fluids. This assay has high sensitivity and excellent specificity for detection of Kallikrein 13 (KLK13) No significant cross-reactivity or interference between Kallikrein 13 (KLK13) and analogues was
Specificity: This assay has high sensitivity and excellent specificity for detection of Kallikrein 13 (KLK13)		homogenates, cell lysates and other biological fluids. This assay has high sensitivity and excellent specificity for detection of Kallikrein 13 (KLK13) No significant cross-reactivity or interference between Kallikrein 13 (KLK13) and analogues was observed.
	Sample Type:	homogenates, cell lysates and other biological fluids. This assay has high sensitivity and excellent specificity for detection of Kallikrein 13 (KLK13) No significant cross-reactivity or interference between Kallikrein 13 (KLK13) and analogues was observed. Cell Lysate, Plasma, Serum, Tissue Homogenate
Sensitivity: < 6.7 pg/mL	Sample Type: Analytical Method:	homogenates, cell lysates and other biological fluids. This assay has high sensitivity and excellent specificity for detection of Kallikrein 13 (KLK13) No significant cross-reactivity or interference between Kallikrein 13 (KLK13) and analogues was observed. Cell Lysate, Plasma, Serum, Tissue Homogenate Quantitative
	Sample Type: Analytical Method: Detection Method:	homogenates, cell lysates and other biological fluids. This assay has high sensitivity and excellent specificity for detection of Kallikrein 13 (KLK13) No significant cross-reactivity or interference between Kallikrein 13 (KLK13) and analogues was observed. Cell Lysate, Plasma, Serum, Tissue Homogenate Quantitative

Target Details

Target Details	
Target:	Kallikrein 13 (KLK13)
Alternative Name:	Kallikrein 13 (KLK13) (KLK13 Products)
Pathways:	Complement System
Application Details	
Application Notes:	Stability: The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5 % within the expiration date under appropriate storage conditions. To minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout. Recommended dilutions: Optimal dilutions/concentrations should be determined by the end user. Standard Form: Lyophilized
Comment:	The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5% within the expiration date under appropriate storage conditions minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout.
Plate:	Pre-coated Pre-coated
Restrictions:	For Research Use only
Handling	

Storage:	4 °C/-20 °C
Storage Comment:	Upon receipt, store the kit according to the storage instruction in the kit's manual.
Expiry Date:	6 months
