

Datasheet for ABIN2535855 **Klotho beta ELISA Kit**

Overview

Quantity:	96 tests
Target:	Klotho beta (KLB)
Reactivity:	Mouse
Method Type:	Sandwich ELISA
Detection Range:	15.62 pg/mL - 1000 pg/mL
Minimum Detection Limit:	15.62 pg/mL
Application:	ELISA
Product Details	
Purpose:	Mouse Klotho Beta ELISA Kit is a sandwich ELISA kit for use with Serum, plasma, tissue homogenates and other biological fluids. This assay has high sensitivity and excellent specificity for detection of Klotho Beta (KLb) No significant cross-reactivity or interference between Klotho Beta (KLb) and analogues was observed.
	homogenates and other biological fluids. This assay has high sensitivity and excellent specificity for detection of Klotho Beta (KLb) No significant cross-reactivity or interference between Klotho Beta (KLb) and analogues was
Purpose:	homogenates and other biological fluids. This assay has high sensitivity and excellent specificity for detection of Klotho Beta (KLb) No significant cross-reactivity or interference between Klotho Beta (KLb) and analogues was observed.
Purpose: Sample Type:	homogenates and other biological fluids. This assay has high sensitivity and excellent specificity for detection of Klotho Beta (KLb) No significant cross-reactivity or interference between Klotho Beta (KLb) and analogues was observed. Plasma, Serum, Tissue Homogenate
Purpose: Sample Type: Analytical Method:	 homogenates and other biological fluids. This assay has high sensitivity and excellent specificity for detection of Klotho Beta (KLb) No significant cross-reactivity or interference between Klotho Beta (KLb) and analogues was observed. Plasma, Serum, Tissue Homogenate Quantitative

Target Details	
Target:	Klotho beta (KLB)
Abstract:	KLB Products
Pathways:	Fc-epsilon Receptor Signaling Pathway, EGFR Signaling Pathway, Neurotrophin Signaling
	Pathway, Growth Factor Binding

Application Details

Application Notes:	Stability: The stability of the kit is determined by the rate of activity loss. The loss rate is less
	than 5 % within the expiration date under appropriate storage conditions. To minimize
	performance fluctuations, operation procedures and lab conditions should be strictly controlled
	It is also strongly suggested that the whole assay is performed by the same user throughout.
	Recommended dilutions: Optimal dilutions/concentrations should be determined by the end
	user.
	Standard Form: Lyophilized
Comment:	The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5%
	within the expiration date under appropriate storage conditions minimize performance
	fluctuations, operation procedures and lab conditions should be strictly controlled. It is also
	strongly suggested that the whole assay is performed by the same user throughout.
Plate:	Pre-coated
Restrictions:	For Research Use only
Handling	
Storage:	4 °C/-20 °C
Storage Comment:	Upon receipt, store the kit according to the storage instruction in the kit's manual.
Expiry Date:	6 months
