

Datasheet for ABIN2535884

Lacritin ELISA Kit

Overview

O V CI VIC VV	
Quantity:	96 tests
Target:	Lacritin (LACRT)
Reactivity:	Human
Method Type:	Sandwich ELISA
Detection Range:	1.56 ng/mL - 100 ng/mL
Minimum Detection Limit:	1.56 ng/mL
Application:	ELISA
Product Details	
Purpose:	Human Lacritin ELISA Kit is a sandwich ELISA kit for use with Saliva and tears. This assay has high sensitivity and excellent specificity for detection of Lacritin (LACRT) No significant cross-reactivity or interference between Lacritin (LACRT) and analogues was observed.
Sample Type:	Saliva, Tears
Analytical Method:	Quantitative
Detection Method:	Colorimetric
Specificity:	This assay has high sensitivity and excellent specificity for detection of Lacritin (LACRT)
Sensitivity:	< 0.63 ng/mL
Target Details	
Target:	Lacritin (LACRT)

Target Details

Abstract:	LACRT Products
Application Details	
Application Notes:	Stability: The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5 % within the expiration date under appropriate storage conditions. To minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout. Recommended dilutions: Optimal dilutions/concentrations should be determined by the end user. Standard Form: Lyophilized
Comment:	The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5% within the expiration date under appropriate storage conditions minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout.
Plate:	Pre-coated
Restrictions:	For Research Use only
Handling	
Storage:	4 °C/-20 °C
Storage Comment:	Upon receipt, store the kit according to the storage instruction in the kit's manual.
Expiry Date:	6 months
