

Datasheet for ABIN2535936

Laminin beta 3 ELISA Kit

Overview

Overview	
Quantity:	96 tests
Target:	Laminin beta 3 (LAMB3)
Reactivity:	Human
Method Type:	Sandwich ELISA
Detection Range:	0.781 ng/mL - 50 ng/mL
Minimum Detection Limit:	0.781 ng/mL
Application:	ELISA
Product Details	
Purpose:	Human Laminin Beta 3 ELISA Kit is a sandwich ELISA kit for use with Serum, plasma and other
Purpose:	Human Laminin Beta 3 ELISA Kit is a sandwich ELISA kit for use with Serum, plasma and other biological fluids. This assay has high sensitivity and excellent specificity for detection of

than 5 % within the expiration date under appropriate storage conditions. To minimize performance fluctuations, operation procedures and lab conditions should be strictly con It is also strongly suggested that the whole assay is performed by the same user through Recommended dilutions: Optimal dilutions/concentrations should be determined by the expiration as the stability of the kit is determined by the rate of activity loss. The loss rate is less than the within the expiration date under appropriate storage conditions minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout. Plate: Pre-coated Restrictions: For Research Use only Handling	Target Details		
Pathways: Brown Fat Cell Differentiation Application Details Application Notes: Stability: The stability of the kit is determined by the rate of activity loss. The loss rate is let than 5 % within the expiration date under appropriate storage conditions. To minimize performance fluctuations, operation procedures and lab conditions should be strictly conditionally suggested that the whole assay is performed by the same user through Recommended dilutions: Optimal dilutions/concentrations should be determined by the example user. Standard Form: Lyophilized Comment: The stability of the kit is determined by the rate of activity loss. The loss rate is less than 8 within the expiration date under appropriate storage conditions minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout. Plate: Pre-coated Restrictions: For Research Use only	Target:	Laminin beta 3 (LAMB3)	
Application Details Application Notes: Stability: The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5 % within the expiration date under appropriate storage conditions. To minimize performance fluctuations, operation procedures and lab conditions should be strictly condit is also strongly suggested that the whole assay is performed by the same user through Recommended dilutions: Optimal dilutions/concentrations should be determined by the expiration date under appropriate storage conditions. The loss rate is less than the within the expiration date under appropriate storage conditions. In minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout. Plate: Pre-coated Restrictions: For Research Use only Handling	Alternative Name:	Laminin beta 3 (LAMb3) (LAMB3 Products)	
Application Notes: Stability: The stability of the kit is determined by the rate of activity loss. The loss rate is let than 5 % within the expiration date under appropriate storage conditions.
