Datasheet for ABIN2536019 **Leptospira IgM ELISA Kit**

Overview

Quantity:	96 tests
Target:	Leptospira IgM
Reactivity:	Monkey
Application:	ELISA

Product Details

Purpose:	Monkey Leptospira IgM ELISA Kit is an ELISA kit against Monkey Leptospira IgM.
Sample Type:	Cell Culture Supernatant, Plasma, Serum
Analytical Method:	Qualitative
Detection Method:	Colorimetric
Characteristics:	Monkey Leptospira IgM ELISA Kit is an ELISA kit against Monkey Leptospira IgM.

Target Details

Target:	Leptospira IgM
Abstract:	Leptospira IgM Products
Target Type:	Antibody

Application Details

Application Notes:	Stability: The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5 % within the expiration date under appropriate storage conditions. To minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled.
--------------------	--

Application Details

It is also strongly suggested that the whole assay is performed by the same user throughout.
Recommended dilutions: Optimal dilutions/concentrations should be determined by the end user.

Comment:	The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5% within the expiration date under appropriate storage conditions. To minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout.
----------	---

Plate:	Pre-coated
--------	------------

Restrictions:	For Research Use only
---------------	-----------------------

Handling

Storage:	4 °C/-20 °C
----------	-------------

Storage Comment:	Upon receipt, store the kit according to the storage instruction in the kit's manual.
------------------	---

Expiry Date:	6 months
--------------	----------
