

## Datasheet for ABIN2536587 MT3 ELISA Kit

## Overview

- Overview	
Quantity:	96 tests
Target:	MT3
Reactivity:	Mouse
Method Type:	Sandwich ELISA
Detection Range:	0.156 ng/mL - 10 ng/mL
Minimum Detection Limit:	0.156 ng/mL
Application:	ELISA
Product Details	
Purpose:	Mouse Metallothionein 3 ELISA Kit is a sandwich ELISA kit for use with Serum, plasma, tissue homogenates and other biological fluids. This assay has high sensitivity and excellent specificity for detection of Metallothionein 3 (MT3)  No significant cross-reactivity or interference between Metallothionein 3 (MT3) and analogues was observed.
	homogenates and other biological fluids. This assay has high sensitivity and excellent specificity for detection of Metallothionein 3 (MT3)  No significant cross-reactivity or interference between Metallothionein 3 (MT3) and analogues
Purpose:	homogenates and other biological fluids. This assay has high sensitivity and excellent specificity for detection of Metallothionein 3 (MT3)  No significant cross-reactivity or interference between Metallothionein 3 (MT3) and analogues was observed.
Purpose:  Sample Type:	homogenates and other biological fluids. This assay has high sensitivity and excellent specificity for detection of Metallothionein 3 (MT3)  No significant cross-reactivity or interference between Metallothionein 3 (MT3) and analogues was observed.  Plasma, Serum, Tissue Homogenate
Purpose:  Sample Type:  Analytical Method:	homogenates and other biological fluids. This assay has high sensitivity and excellent specificity for detection of Metallothionein 3 (MT3)  No significant cross-reactivity or interference between Metallothionein 3 (MT3) and analogues was observed.  Plasma, Serum, Tissue Homogenate  Quantitative

## **Target Details**

Target:	MT3
Abstract:	MT3 Products
Pathways:	Hormone Transport, Transition Metal Ion Homeostasis, Regulation of Cell Size, Regulation of Carbohydrate Metabolic Process, Protein targeting to Nucleus
Application Details	
Application Notes:	Stability: The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5 % within the expiration date under appropriate storage conditions. To minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout. Recommended dilutions: Optimal dilutions/concentrations should be determined by the end user.  Standard Form: Lyophilized
Comment:	The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5% within the expiration date under appropriate storage conditions minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout.
Plate:	Pre-coated
Restrictions:	For Research Use only
Handling	
Storage:	4 °C/-20 °C
Storage Comment:	Upon receipt, store the kit according to the storage instruction in the kit's manual.
Expiry Date:	6 months
