

Datasheet for ABIN2536738

Moesin ELISA Kit

Overview

Quantity:	96 tests
Target:	Moesin (MSN)
Reactivity:	Human
Method Type:	Sandwich ELISA
Detection Range:	0.156 ng/mL - 10 ng/mL
Minimum Detection Limit:	0.156 ng/mL
Application:	ELISA
Product Details	
Purpose:	Human Moesin ELISA Kit is a sandwich ELISA kit for use with Tissue homogenates, cell lysates
Purpose:	Human Moesin ELISA Kit is a sandwich ELISA kit for use with Tissue homogenates, cell lysates and other biological fluids. This assay has high sensitivity and excellent specificity for detection
Purpose:	
Purpose:	and other biological fluids. This assay has high sensitivity and excellent specificity for detection
Purpose:	and other biological fluids. This assay has high sensitivity and excellent specificity for detection of Moesin (MSN)
Purpose: Sample Type:	and other biological fluids. This assay has high sensitivity and excellent specificity for detection of Moesin (MSN) No significant cross-reactivity or interference between Moesin (MSN) and analogues was
	and other biological fluids. This assay has high sensitivity and excellent specificity for detection of Moesin (MSN) No significant cross-reactivity or interference between Moesin (MSN) and analogues was observed.
Sample Type:	and other biological fluids. This assay has high sensitivity and excellent specificity for detection of Moesin (MSN) No significant cross-reactivity or interference between Moesin (MSN) and analogues was observed. Cell Lysate, Tissue Homogenate
Sample Type: Analytical Method:	and other biological fluids. This assay has high sensitivity and excellent specificity for detection of Moesin (MSN) No significant cross-reactivity or interference between Moesin (MSN) and analogues was observed. Cell Lysate, Tissue Homogenate Quantitative

Target Details

l arget Details	
Target:	Moesin (MSN)
Abstract:	MSN Products
Pathways:	Asymmetric Protein Localization
Application Details	
Application Notes:	Stability: The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5 % within the expiration date under appropriate storage conditions. To minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout. Recommended dilutions: Optimal dilutions/concentrations should be determined by the end user. Standard Form: Lyophilized
Comment:	The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5% within the expiration date under appropriate storage conditions minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout.
Plate:	Pre-coated
Restrictions:	For Research Use only
Handling	

Storage:	4 °C/-20 °C
Storage Comment:	Upon receipt, store the kit according to the storage instruction in the kit's manual.
Expiry Date:	6 months
