

## Datasheet for ABIN2536935 MYH7 ELISA Kit

Overview

| Quantity:                | 96 tests   |
|--------------------------|--|
| Target:                  | MYH7   |
| Reactivity:              | Mouse  |
| Method Type:             | Sandwich ELISA   |
| Detection Range:         | 31.25 pg/mL - 2000 pg/mL   |
| Minimum Detection Limit: | 31.25 pg/mL  |
| Application:             | ELISA  |
| Product Details          |  |
| Purpose:                 | Mouse MYH7 ELISA Kit is a sandwich ELISA kit for use with Serum, plasma, tissue                  |
|                          | homogenates and other biological fluids. This assay has high sensitivity and excellent           |
|                          | specificity for detection of Myosin Heavy Chain 7, Cardiac Muscle, Beta (MYH7)                   |
|                          | No significant cross-reactivity or interference between Myosin Heavy Chain 7, Cardiac Muscle,    |
|                          | Beta (MYH7) and analogues was observed.  |
| Sample Type:             | Plasma, Serum, Tissue Homogenate   |
| Analytical Method:       | Quantitative   |
| Detection Method:        | Colorimetric   |
| Specificity:             | This assay has high sensitivity and excellent specificity for detection of Myosin Heavy Chain 7, |
|                          | Cardiac Muscle, Beta (MYH7)  |
| Sensitivity:             | < 12.4 pg/mL   |

| Target Details      |  |
|---------------------|--|
| Target:             | MYH7   |
| Abstract:           | MYH7 Products  |
| Application Details |  |
| Application Notes:  | Stability: The stability of the kit is determined by the rate of activity loss. The loss rate is less<br>than 5 % within the expiration date under appropriate storage conditions. To minimize<br>performance fluctuations, operation procedures and lab conditions should be strictly controlled.<br>It is also strongly suggested that the whole assay is performed by the same user throughout.<br>Recommended dilutions: Optimal dilutions/concentrations should be determined by the end<br>user.<br>Standard Form: Lyophilized |
| Comment:            | The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5% within the expiration date under appropriate storage conditions minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout.  |
| Plate:              | Pre-coated   |
| Restrictions:       | For Research Use only  |
| Handling            |  |
| Storage:            | 4 °C/-20 °C  |
| Storage Comment:    | Upon receipt, store the kit according to the storage instruction in the kit's manual.  |
| Expiry Date:        | 6 months   |
