

Datasheet for ABIN2536965 **MX1 ELISA Kit**

Overview

96 tests
MX1
Human
Sandwich ELISA
1.56 ng/mL - 100 ng/mL
1.56 ng/mL
ELISA
Human MX1 ELISA Kit is a sandwich ELISA kit for use with Tissue homogenates, cell lysates and other biological fluids. This assay has high sensitivity and excellent specificity for detection of MX1 No significant cross-reactivity or interference between MX1 and analogues was observed.
and other biological fluids. This assay has high sensitivity and excellent specificity for detection of MX1
and other biological fluids. This assay has high sensitivity and excellent specificity for detection of MX1 No significant cross-reactivity or interference between MX1 and analogues was observed.
and other biological fluids. This assay has high sensitivity and excellent specificity for detection of MX1 No significant cross-reactivity or interference between MX1 and analogues was observed. Cell Lysate, Tissue Homogenate
and other biological fluids. This assay has high sensitivity and excellent specificity for detection of MX1 No significant cross-reactivity or interference between MX1 and analogues was observed. Cell Lysate, Tissue Homogenate Quantitative

Target Details	
Target:	MX1
Alternative Name:	Myxovirus Resistance 1 (MX1) (MX1 Products)
Application Details	
Application Notes:	Stability: The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5 % within the expiration date under appropriate storage conditions. To minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout. Recommended dilutions: Optimal dilutions/concentrations should be determined by the end user. Standard Form: Lyophilized
Comment:	The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5% within the expiration date under appropriate storage conditions minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout.
Plate:	Pre-coated
Restrictions:	For Research Use only
Handling	
Storage:	4 °C/-20 °C
Storage Comment:	Upon receipt, store the kit according to the storage instruction in the kit's manual.
Expiry Date:	6 months
