

## Datasheet for ABIN2537167

## **Neuropilin 1 ELISA Kit**

## Overview

Quantity:	96 tests
Target:	Neuropilin 1 (NRP1)
Reactivity:	Rat
Method Type:	Sandwich ELISA
Detection Range:	0.156 ng/mL - 10 ng/mL
Minimum Detection Limit:	0.156 ng/mL
Application:	ELISA
Product Details	
Purpose:	Rat Neuropilin 1 ELISA Kit is a sandwich ELISA kit for use with Tissue homogenates, cell lysates
Purpose:	Rat Neuropilin 1 ELISA Kit is a sandwich ELISA kit for use with Tissue homogenates, cell lysates and other biological fluids. This assay has high sensitivity and excellent specificity for detection
Purpose:	
Purpose:	and other biological fluids. This assay has high sensitivity and excellent specificity for detection
Purpose:	and other biological fluids. This assay has high sensitivity and excellent specificity for detection of Neuropilin 1 (NRP1)
Purpose:  Sample Type:	and other biological fluids. This assay has high sensitivity and excellent specificity for detection of Neuropilin 1 (NRP1)  No significant cross-reactivity or interference between Neuropilin 1 (NRP1) and analogues was
	and other biological fluids. This assay has high sensitivity and excellent specificity for detection of Neuropilin 1 (NRP1)  No significant cross-reactivity or interference between Neuropilin 1 (NRP1) and analogues was observed.
Sample Type:	and other biological fluids. This assay has high sensitivity and excellent specificity for detection of Neuropilin 1 (NRP1)  No significant cross-reactivity or interference between Neuropilin 1 (NRP1) and analogues was observed.  Cell Lysate, Tissue Homogenate
Sample Type: Analytical Method:	and other biological fluids. This assay has high sensitivity and excellent specificity for detection of Neuropilin 1 (NRP1)  No significant cross-reactivity or interference between Neuropilin 1 (NRP1) and analogues was observed.  Cell Lysate, Tissue Homogenate  Quantitative

## **Target Details**

Target Details	
Target:	Neuropilin 1 (NRP1)
Abstract:	NRP1 Products
UniProt:	Q9QWJ9, Q9QX38
Pathways:	Regulation of Cell Size, Signaling Events mediated by VEGFR1 and VEGFR2, Smooth Muscle
	Cell Migration, Platelet-derived growth Factor Receptor Signaling, VEGFR1 Specific Signals
Application Details	
Application Notes:	Stability: The stability of the kit is determined by the rate of activity loss. The loss rate is less
	than 5 $\%$ within the expiration date under appropriate storage conditions. To minimize
	performance fluctuations, operation procedures and lab conditions should be strictly controlled.
	It is also strongly suggested that the whole assay is performed by the same user throughout.
	Recommended dilutions: Optimal dilutions/concentrations should be determined by the end
	user.
	Standard Form: Lyophilized
Comment:	The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5%
	within the expiration date under appropriate storage conditions minimize performance
	fluctuations, operation procedures and lab conditions should be strictly controlled. It is also
	strongly suggested that the whole assay is performed by the same user throughout.
Plate:	Pre-coated
Restrictions:	For Research Use only
Handling	
Storage:	4 °C/-20 °C
Storage Comment:	Upon receipt, store the kit according to the storage instruction in the kit's manual.
Expiry Date:	6 months
