

## Datasheet for ABIN2537387 Orexin ELISA Kit

Overview

Quantity:	96 tests
Target:	Orexin (OX)
Reactivity:	Mouse
Method Type:	Competition ELISA
Detection Range:	6.17 pg/mL - 500 pg/mL
Minimum Detection Limit:	6.17 pg/mL
Application:	ELISA
Product Details	
Purpose:	Mouse Orexin ELISA Kit is a competitive ELISA kit for use with Serum, plasma and other biological fluids. This assay has high sensitivity and excellent specificity for detection of Orexin (OX) No significant cross-reactivity or interference between Orexin (OX) and analogues was observed.
Purpose: Sample Type:	biological fluids. This assay has high sensitivity and excellent specificity for detection of Orexin (OX) No significant cross-reactivity or interference between Orexin (OX) and analogues was

Target Details		
Target:	Orexin (OX)	
Abstract:	OX Products	
Pathways:	Synaptic Membrane, Feeding Behaviour	
Application Details		
Application Notes:	Stability: The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5 % within the expiration date under appropriate storage conditions. To minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout. Recommended dilutions: Optimal dilutions/concentrations should be determined by the end user. Standard Form: Lyophilized	
Comment:	The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5% within the expiration date under appropriate storage conditions minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout.	
Plate:	Pre-coated	
Restrictions:	For Research Use only	
Handling		
Storage:	4 °C/-20 °C	
Storage Comment:	Upon receipt, store the kit according to the storage instruction in the kit's manual.	
Expiry Date:	6 months
