Human Orosomucoid 2 ELISA Kit is a sandwich ELISA kit for use with Serum, plasma and other
Human Orosomucoid 2 ELISA Kit is a sandwich ELISA kit for use with Serum, plasma and other biological fluids. This assay has high sensitivity and excellent specificity for detection of
biological fluids. This assay has high sensitivity and excellent specificity for detection of
biological fluids. This assay has high sensitivity and excellent specificity for detection of Orosomucoid 2 (ORM2)
biological fluids. This assay has high sensitivity and excellent specificity for detection of Orosomucoid 2 (ORM2) No significant cross-reactivity or interference between Orosomucoid 2 (ORM2) and analogues
biological fluids. This assay has high sensitivity and excellent specificity for detection of Orosomucoid 2 (ORM2) No significant cross-reactivity or interference between Orosomucoid 2 (ORM2) and analogues was observed.
biological fluids. This assay has high sensitivity and excellent specificity for detection of Orosomucoid 2 (ORM2) No significant cross-reactivity or interference between Orosomucoid 2 (ORM2) and analogues was observed. Plasma, Serum
biological fluids. This assay has high sensitivity and excellent specificity for detection of Orosomucoid 2 (ORM2) No significant cross-reactivity or interference between Orosomucoid 2 (ORM2) and analogues was observed. Plasma, Serum Quantitative

Target Details

Target:	Orosomucoid 2 (ORM2)
Abstract:	ORM2 Products
UniProt:	P19652

UniProt:	P19652
Application Details	
Application Notes:	Stability: The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5 % within the expiration date under appropriate storage conditions. To minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout. Recommended dilutions: Optimal dilutions/concentrations should be determined by the end user. Standard Form: Lyophilized
Comment:	The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5% within the expiration date under appropriate storage conditions minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout.
Plate:	Pre-coated
Restrictions:	For Research Use only
Handling	
Storage:	4 °C/-20 °C
Storage Comment:	Upon receipt, store the kit according to the storage instruction in the kit's manual.
Expiry Date:	6 months
