

Datasheet for ABIN2537505

alpha KGDHC ELISA Kit

Overview

Quantity:	96 tests
Target:	alpha KGDHC (alphaKGDHC)
Reactivity:	Human
Method Type:	Sandwich ELISA
Detection Range:	1.56 ng/mL - 100 ng/mL
Minimum Detection Limit:	1.56 ng/mL
Application:	ELISA
Product Details	
Purpose:	Human OGDH ELISA Kit is a sandwich ELISA kit for use with Tissue homogenates, cell lysates and other biological fluids. This assay has high sensitivity and excellent specificity for detection of Oxoglutarate Dehydrogenase (OGDH) No significant cross-reactivity or interference between Oxoglutarate Dehydrogenase (OGDH)
Sample Type:	and analogues was observed. Cell Lysate, Tissue Homogenate
Analytical Method:	Quantitative
Detection Method:	Colorimetric
Specificity:	This assay has high sensitivity and excellent specificity for detection of Oxoglutarate Dehydrogenase (OGDH)
Sensitivity:	< 0.55 ng/mL

Target Details

It is also strongly suggested that the whole assay is performed by the same user throughout. Recommended dilutions: Optimal dilutions/concentrations should be determined by the end user. Standard Form: Lyophilized Comment: The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5% within the expiration date under appropriate storage conditions minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout. Plate: Pre-coated Restrictions: For Research Use only Handling Storage: 4 °C/-20 °C Storage Comment: Upon receipt, store the kit according to the storage instruction in the kit's manual.	Target:	alpha KGDHC (alphaKGDHC)
Application Notes: Stability: The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5 % within the expiration date under appropriate storage conditions. To minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout. Recommended dilutions: Optimal dilutions/concentrations should be determined by the end user.
