

## Datasheet for ABIN2537587

## **Paralemmin ELISA Kit**

## Overview

Quantity:	96 tests
Target:	Paralemmin (PALM)
Reactivity:	Human
Method Type:	Sandwich ELISA
Detection Range:	0.156 ng/mL - 10 ng/mL
Minimum Detection Limit:	0.156 ng/mL
Application:	ELISA
Product Details	
Purpose:	Human Paralemmin ELISA Kit is a sandwich ELISA kit for use with Tissue homogenates and
Purpose:	Human Paralemmin ELISA Kit is a sandwich ELISA kit for use with Tissue homogenates and other biological fluids. This assay has high sensitivity and excellent specificity for detection of

Purpose:  Sample Type:	other biological fluids. This assay has high sensitivity and excellent specificity for detection of Paralemmin (PALM)  No significant cross-reactivity or interference between Paralemmin (PALM) and analogues was
	other biological fluids. This assay has high sensitivity and excellent specificity for detection of Paralemmin (PALM)  No significant cross-reactivity or interference between Paralemmin (PALM) and analogues was observed.
Sample Type:	other biological fluids. This assay has high sensitivity and excellent specificity for detection of Paralemmin (PALM)  No significant cross-reactivity or interference between Paralemmin (PALM) and analogues was observed.  Tissue Homogenate
Sample Type: Analytical Method:	other biological fluids. This assay has high sensitivity and excellent specificity for detection of Paralemmin (PALM)  No significant cross-reactivity or interference between Paralemmin (PALM) and analogues was observed.  Tissue Homogenate  Quantitative

## Target Details

Target:	Paralemmin (PALM)
Abstract:	PALM Products
Pathways:	cAMP Metabolic Process, Regulation of G-Protein Coupled Receptor Protein Signaling
Application Details	
Application Notes:	Stability: The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5 % within the expiration date under appropriate storage conditions. To minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout. Recommended dilutions: Optimal dilutions/concentrations should be determined by the end user.  Standard Form: Lyophilized
Comment:	The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5% within the expiration date under appropriate storage conditions minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout.
Plate:	Pre-coated
Restrictions:	For Research Use only
Handling	
Storage:	4 °C/-20 °C
Storage Comment:	Upon receipt, store the kit according to the storage instruction in the kit's manual.
Expiry Date:	6 months
