

Datasheet for ABIN2537805 PFKM ELISA Kit

[Go to Product page](#)

Overview

Quantity:	96 tests
Target:	PFKM
Reactivity:	Human
Detection Range:	0.06 ng/mL - 4 ng/mL
Minimum Detection Limit:	0.06 ng/mL
Application:	ELISA

Product Details

Purpose:	Human Phosphofructokinase ELISA Kit is an ELISA kit against Human Phosphofructokinase.
Sample Type:	Cell Culture Supernatant, Plasma, Serum
Analytical Method:	Quantitative
Detection Method:	Colorimetric
Sensitivity:	0.01 ng/mL
Characteristics:	Human Phosphofructokinase ELISA Kit is an ELISA kit against Human Phosphofructokinase.

Target Details

Target:	PFKM
Alternative Name:	Phosphofructokinase (PFKM Products)
Pathways:	Positive Regulation of Peptide Hormone Secretion , Negative Regulation of Hormone Secretion , Carbohydrate Homeostasis , Warburg Effect

Application Details

Application Notes: Stability: The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5 % within the expiration date under appropriate storage conditions. To minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout. Recommended dilutions: Optimal dilutions/concentrations should be determined by the end user.

Comment: The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5% within the expiration date under appropriate storage conditions. - minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout.

Plate: Pre-coated

Restrictions: For Research Use only

Handling

Storage: 4 °C/-20 °C

Storage Comment: Upon receipt, store the kit according to the storage instruction in the kit's manual.

Expiry Date: 6 months
