

Datasheet for ABIN2538102 Presenilin 1 ELISA Kit

Overview

Quantity:	96 tests
Target:	Presenilin 1 (PSEN1)
Reactivity:	Rat
Method Type:	Sandwich ELISA
Detection Range:	0.156 g/mL - 10 g/mL
Minimum Detection Limit:	0.156 g/mL
Application:	ELISA
Product Details	
Purpose:	Rat Presenilin 1 ELISA Kit is a sandwich ELISA kit for use with Tissue homogenates and other biological fluids. This assay has high sensitivity and excellent specificity for detection of Presenilin 1 (PSEN1) No significant cross-reactivity or interference between Presenilin 1 (PSEN1) and analogues was observed.
Purpose: Sample Type:	biological fluids. This assay has high sensitivity and excellent specificity for detection of Presenilin 1 (PSEN1) No significant cross-reactivity or interference between Presenilin 1 (PSEN1) and analogues was
	biological fluids. This assay has high sensitivity and excellent specificity for detection of Presenilin 1 (PSEN1) No significant cross-reactivity or interference between Presenilin 1 (PSEN1) and analogues was observed.
Sample Type:	 biological fluids. This assay has high sensitivity and excellent specificity for detection of Presenilin 1 (PSEN1) No significant cross-reactivity or interference between Presenilin 1 (PSEN1) and analogues was observed. Tissue Homogenate
Sample Type: Analytical Method:	 biological fluids. This assay has high sensitivity and excellent specificity for detection of Presenilin 1 (PSEN1) No significant cross-reactivity or interference between Presenilin 1 (PSEN1) and analogues was observed. Tissue Homogenate Quantitative

Target Details	
Target:	Presenilin 1 (PSEN1)
Abstract:	PSEN1 Products
Pathways:	Notch Signaling, EGFR Signaling Pathway, Synaptic Vesicle Exocytosis, Dicarboxylic Acid Transport

Application Details

Application Notes:	Stability: The stability of the kit is determined by the rate of activity loss. The loss rate is less
	than 5 % within the expiration date under appropriate storage conditions. To minimize
	performance fluctuations, operation procedures and lab conditions should be strictly controlled
	It is also strongly suggested that the whole assay is performed by the same user throughout.
	Recommended dilutions: Optimal dilutions/concentrations should be determined by the end
	user.
	Standard Form: Lyophilized
Comment:	The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5%
	within the expiration date under appropriate storage conditions minimize performance
	fluctuations, operation procedures and lab conditions should be strictly controlled. It is also
	strongly suggested that the whole assay is performed by the same user throughout.
	strongly suggested that the whole assay is performed by the same user throughout.
Plate:	Pre-coated
Restrictions:	For Research Use only
Handling	
Storage:	4 °C/-20 °C
Storage Comment:	Upon receipt, store the kit according to the storage instruction in the kit's manual.
Expiry Date:	6 months
