

## Datasheet for ABIN2538494 RAD51 Homolog ELISA Kit

Overview

Quantity:	96 tests
Target:	RAD51 Homolog (RAD51)
Reactivity:	Human
Method Type:	Sandwich ELISA
Detection Range:	0.312 ng/mL - 20 ng/mL
Minimum Detection Limit:	0.312 ng/mL
Application:	ELISA
Product Details	
Purpose:	Human RAD51 Homolog ELISA Kit is a sandwich ELISA kit for use with Tissue homogenates
	and other biological fluids. This assay has high sensitivity and excellent specificity for detection
	and other biological fluids. This assay has high sensitivity and excellent specificity for detection of RAD51 Homolog (RAD51)
	of RAD51 Homolog (RAD51)
Sample Type:	of RAD51 Homolog (RAD51) No significant cross-reactivity or interference between RAD51 Homolog (RAD51) and
Sample Type: Analytical Method:	of RAD51 Homolog (RAD51) No significant cross-reactivity or interference between RAD51 Homolog (RAD51) and analogues was observed.
	of RAD51 Homolog (RAD51) No significant cross-reactivity or interference between RAD51 Homolog (RAD51) and analogues was observed. Tissue Homogenate
Analytical Method:	of RAD51 Homolog (RAD51) No significant cross-reactivity or interference between RAD51 Homolog (RAD51) and analogues was observed. Tissue Homogenate Quantitative

Target Details	
Target:	RAD51 Homolog (RAD51)
Abstract:	RAD51 Products
Application Details	
Application Notes:	Stability: The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5 % within the expiration date under appropriate storage conditions. To minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout. Recommended dilutions: Optimal dilutions/concentrations should be determined by the end user. Standard Form: Lyophilized
Comment:	The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5% within the expiration date under appropriate storage conditions minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout.
Plate:	Pre-coated
Restrictions:	For Research Use only
Handling	
Storage:	4 °C/-20 °C
Storage Comment:	Upon receipt, store the kit according to the storage instruction in the kit's manual.
Expiry Date:	6 months
