

## Datasheet for ABIN2538726

## s100a4 ELISA Kit

## Overview

Quantity:	96 tests
Target:	s100a4 (S100A4)
Reactivity:	Human
Method Type:	Sandwich ELISA
Detection Range:	0.78 ng/mL - 50 ng/mL
Minimum Detection Limit:	0.78 ng/mL
Application:	ELISA
Product Details	
Purpose:	Human S100A4 ELISA Kit is a sandwich ELISA kit for use with Serum, plasma, tissue
Purpose:	Human S100A4 ELISA Kit is a sandwich ELISA kit for use with Serum, plasma, tissue homogenates, cell lysates and other biological fluids. This assay has high sensitivity and
Purpose:	
Purpose:	homogenates, cell lysates and other biological fluids. This assay has high sensitivity and
Purpose:  Sample Type:	homogenates, cell lysates and other biological fluids. This assay has high sensitivity and excellent specificity for detection of S100A4
	homogenates, cell lysates and other biological fluids. This assay has high sensitivity and excellent specificity for detection of S100A4  No significant cross-reactivity or interference between S100A4 and analogues was observed.
Sample Type:	homogenates, cell lysates and other biological fluids. This assay has high sensitivity and excellent specificity for detection of S100A4  No significant cross-reactivity or interference between S100A4 and analogues was observed.  Cell Lysate, Plasma, Serum, Tissue Homogenate
Sample Type: Analytical Method:	homogenates, cell lysates and other biological fluids. This assay has high sensitivity and excellent specificity for detection of S100A4  No significant cross-reactivity or interference between S100A4 and analogues was observed.  Cell Lysate, Plasma, Serum, Tissue Homogenate  Quantitative

## Target Details

Target:	s100a4 (S100A4)
Abstract:	S100A4 Products
Pathways:	S100 Proteins

Pathways:	S100 Proteins
Application Details	
Application Notes:	Stability: The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5 % within the expiration date under appropriate storage conditions. To minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout. Recommended dilutions: Optimal dilutions/concentrations should be determined by the end user.  Standard Form: Lyophilized
Comment:	The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5% within the expiration date under appropriate storage conditions minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout.
Plate:	Pre-coated
Restrictions:	For Research Use only
Handling	
Storage:	4 °C/-20 °C
Storage Comment:	Upon receipt, store the kit according to the storage instruction in the kit's manual.
Expiry Date:	6 months
