

Datasheet for ABIN2538814

SCGN ELISA Kit

Overview

Quantity:	96 tests
Target:	SCGN
Reactivity:	Human
Method Type:	Sandwich ELISA
Detection Range:	31.25 pg/mL - 2000 pg/mL
Minimum Detection Limit:	31.25 pg/mL
Application:	ELISA
Product Details	
Purpose:	Human Secretagogin ELISA Kit is a sandwich ELISA kit for use with Serum, plasma and other
Purpose:	Human Secretagogin ELISA Kit is a sandwich ELISA kit for use with Serum, plasma and other biological fluids. This assay has high sensitivity and excellent specificity for detection of

Purpose:	biological fluids. This assay has high sensitivity and excellent specificity for detection of Secretagogin (SCGN)
Purpose: Sample Type:	biological fluids. This assay has high sensitivity and excellent specificity for detection of Secretagogin (SCGN) No significant cross-reactivity or interference between Secretagogin (SCGN) and analogues
	biological fluids. This assay has high sensitivity and excellent specificity for detection of Secretagogin (SCGN) No significant cross-reactivity or interference between Secretagogin (SCGN) and analogues was observed.
Sample Type:	biological fluids. This assay has high sensitivity and excellent specificity for detection of Secretagogin (SCGN) No significant cross-reactivity or interference between Secretagogin (SCGN) and analogues was observed. Plasma, Serum
Sample Type: Analytical Method:	biological fluids. This assay has high sensitivity and excellent specificity for detection of Secretagogin (SCGN) No significant cross-reactivity or interference between Secretagogin (SCGN) and analogues was observed. Plasma, Serum Quantitative

Target Details

SCGN
Secretagogin (SCGN) (SCGN Products)
Stability: The stability of the kit is determined by the rate of activity loss. The loss rate is less
than 5 % within the expiration date under appropriate storage conditions. To minimize
performance fluctuations, operation procedures and lab conditions should be strictly controlled.
It is also strongly suggested that the whole assay is performed by the same user throughout.
Recommended dilutions: Optimal dilutions/concentrations should be determined by the end
user.
Standard Form: Lyophilized
The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5%
within the expiration date under appropriate storage conditions minimize performance
fluctuations, operation procedures and lab conditions should be strictly controlled. It is also
strongly suggested that the whole assay is performed by the same user throughout.
Pre-coated
For Research Use only
4 °C/-20 °C
Upon receipt, store the kit according to the storage instruction in the kit's manual.
6 months
