

Datasheet for ABIN2538893

Septin 3 ELISA Kit

Overview

| Quantity: | 96 tests |
|---------------------------------|---|
| Target: | Septin 3 (SEPT3) |
| Reactivity: | Human |
| Method Type: | Sandwich ELISA |
| Detection Range: | 0.312 ng/mL - 20 ng/mL |
| Minimum Detection Limit: | 0.312 ng/mL |
| Application: | ELISA |
| Product Details | |
| | |
| Purpose: | Human Septin 3 ELISA Kit is a sandwich ELISA kit for use with Tissue homogenates and other |
| Purpose: | Human Septin 3 ELISA Kit is a sandwich ELISA kit for use with Tissue homogenates and other biological fluids. This assay has high sensitivity and excellent specificity for detection of Septin |

| Sample Type: | biological fluids. This assay has high sensitivity and excellent specificity for detection of Septin 3 (SEPT3) No significant cross-reactivity or interference between Septin 3 (SEPT3) and analogues was observed. Tissue Homogenate |
| Sample Type: Analytical Method: | biological fluids. This assay has high sensitivity and excellent specificity for detection of Septin 3 (SEPT3) No significant cross-reactivity or interference between Septin 3 (SEPT3) and analogues was observed. Tissue Homogenate Quantitative |

Target Details

Storage:

Expiry Date:

Storage Comment:

| Target Details | |
|---------------------|--|
| Target: | Septin 3 (SEPT3) |
| Abstract: | SEPT3 Products |
| Pathways: | Negative Regulation of intrinsic apoptotic Signaling |
| Application Details | |
| Application Notes: | Stability: The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5 % within the expiration date under appropriate storage conditions. To minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled It is also strongly suggested that the whole assay is performed by the same user throughout. Recommended dilutions: Optimal dilutions/concentrations should be determined by the end user. Standard Form: Lyophilized |
| Comment: | The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5% within the expiration date under appropriate storage conditions minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout. |
| Plate: | Pre-coated |
| Restrictions: | For Research Use only |
| Handling | |

4 °C/-20 °C

6 months

Upon receipt, store the kit according to the storage instruction in the kit's manual.
