Datasheet for ABIN2539050

SBEM ELISA Kit

Overview

Quantity:	96 tests
Target:	SBEM
Reactivity:	Human
Detection Range:	78 pg/mL - 4000 pg/mL
Minimum Detection Limit:	78 pg/mL
Application:	ELISA

Product Details

Purpose:	Human Small Breast Epithelial Mucin ELISA Kit is an ELISA kit against Human Small Breast Epithelial Mucin.
Sample Type:	Cell Culture Supernatant, Plasma, Serum
Analytical Method:	Quantitative
Detection Method:	Colorimetric
Sensitivity:	22 pg/mL
Characteristics:	Human Small Breast Epithelial Mucin ELISA Kit is an ELISA kit against Human Small Breast Epithelial Mucin.

Target Details

Target:	SBEM
Alternative Name:	Small Breast Epithelial Mucin (SBEM Products)

Application Details

Application Notes:	Stability: The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5 % within the expiration date under appropriate storage conditions. To minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout. Recommended dilutions: Optimal dilutions/concentrations should be determined by the end user.
Comment:	The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5% within the expiration date under appropriate storage conditions. To minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout.
Plate:	Pre-coated
Restrictions:	For Research Use only

Handling

Storage:	4 °C/-20 °C
Storage Comment:	Upon receipt, store the kit according to the storage instruction in the kit's manual.
Expiry Date:	6 months
